Projects

1. **Cafeteria Website**

https://shreejadhav007.github.io/YummyTummyCafe.github.io/

- Developed a responsive website using HTML, CSS, and JavaScript to ensure optimal performance across various devices and browsers.

- Implemented a user-friendly navigation system and intuitive interface to enhance the overall user experience.

- I worked as a frontend as well as database Developer.

1. **School Management System Using Python**

- This is the software based on python language, which includes CRUD operations connected with database.
It stores data of students and performs required operations as per need.

- This is my personal project done using python and various modules.

1. **Online Medicine Donation Software**

- Develop an intuitive and secure online platform that facilitates the donation of unused or unexpired medicines to individuals in need.

- The software aims to streamline the donation process, ensure regulatory compliance, and maximize the impact of medicine donations in improving access to healthcare for undeserved communities.

- This is my Last Year project , and I worked as database developer as well as some part of frontend .

1. **Ecommerce Website**

https://trendii.netlify.app/

- This website includes MERN technology with MongoDB cluster database

1. **TODO Web Application**

https://scheduliadaily.netlify.app/

This app includes CRUD operations and it has ability to add new users and login into same user
